Logistics Management System

Logistics Management System

## Streamlined Importer Security Filing with the FreightStream ISF Web Application

Introducing FreightStream ISF, an innovative Importer Security Filing software solution designed to make your business more efficient and productive. With FsISF, whether you are a Freight Forwarder (NVOCC), Customs Broker or an Importer, you will enjoy a quick and easy to use system, backed by extensive industry expertise.

- Set security levels for entries or to restrict access to certain specific modules and information
- User-friendly data entry screen, start & finish your filing all in one place
- See up to the minute status of all your entries from your entry view list
- Reliable 24/7 VPN data connection to Customs (instant transmission results)
- Powerful search function lets you search through any module by any data field, with as little as 1 character
- Online web based software allows you to electronically manage your entries, effectively reducing or eliminating paperwork
- Automatic detailed log history keeps track of all the CBP responses relating to your entries
- Validation checks located throughout all modules, reducing or eliminating errors
- Bulk submission feature allows you to send multiple entries to CBP for validation
